Experience

Beetonz Infotech, Surat — Senior Android developer
August 2021– Present

- Orchestrated the end-to-end implementation of a VPN application, encompassing the configuration of an Ubuntu VPN server with OpenVPN integration to ensure secure and seamless connectivity for users. This project provided valuable insights into both server-side coding and Android client-side development.

- Engineered a high-performance video editing application using OpenGL, optimizing graphical rendering to provide users with a smooth and intuitive editing experience. This project deepened my understanding of the GLSL language, enriching my skills in graphics programming.

- Designed and developed API-driven applications utilizing the MVVM architecture pattern, integrating LiveData for real-time data updates, thereby ensuring robust, scalable, and responsive user experiences.

- Created a simple API-driven Flutter application, expanding expertise into cross-platform development and further enhancing proficiency in modern app development frameworks.

- Demonstrated proficiency in app development by successfully creating over 100 innovative applications, showcasing versatility, adaptability, and a strong track record of delivering high-quality software solutions.

EDUCATION

Prime Institute of Engineering & Technology,Navsari — B.E. Computer Engineering

Passing year-2021

- CGPA– 8.66/10
- Bachelor in computer engineering

Vidya Bharti English & Hindi School, Surat — HSC(12th)

Passing year- 2017

I Received my higher secondary education with an aggregation of 60%

In the year 2017
